Portfolio

Senior Frontend Engineer with 8+ years of experience in React, Next.js, Vue.js, and Angular. Led a 20+ engineer team at Nexus(an enterprise platform like Microsoft Teams) to deliver scalable solutions that increased user engagement by 30%. Skilled in Micro-Frontends, CI/CD, Docker, and Agile practices, with a strong focus on Clean Architecture, mentorship, and reusable design systems.

EXPERIENCE

Nexus, Isfahan— Senior Front-End Developer

Apr 2023 - PRESENT

Overhauled AI-driven messaging, calendar, and planning tools that streamlined workflows, reducing time-to-decision by 40% for key technical initiatives, and increased project launch velocity.

- Pioneered a modern messaging architecture utilizing Zustand, React Query, and IndexedDB, mentoring a team of 8+ engineers to build a high-performance, offline-ready communication platform with an emphasis on clean architecture and maintainability.
- Championed professional development for 20+ engineers, contributing to 7 early project launches through focused technical coaching.
- Established 25+ CI/CD pipelines and Dockerized applications, optimizing deployment efficiency.
- Managed a diverse group exceeding 20+ developers; provided mentorship to at least 11+ individuals while implementing tailored development programs that enhanced skills and productivity across the entire technical team.
- Spearheaded development of enterprise messaging platform, integrating real-time chat and ticketing; decreased internal email volume by 60% and accelerated project turnaround time by 35% within six months of launch.

Kasra, Isfahan— Front-End Developer

Apr 2018 - May 2023 (5+ years)

Kasra, a leading provider of workforce management solutions, serves 3,000+ clients and leverages 28 years of expertise to deliver innovative software.

- Engineered 10+ user-facing web applications and admin dashboards using React/Redux and Angular, incorporating 100+ reusable components with plugins, mixins, and directives.
- Spearheaded improvements in development, code review, release, and bug-fixing methodologies within the team, leveraging Scrum/agile best practices for over 1000+ hours.
- Enhanced performance and scalability through lazy loading, code splitting, and bundle optimization, reducing initial load times by up to 25%.
- Engineered the GEO-fence module for the Attendance Application, boosting user engagement in location-based features by 30%.
